

FLEXIBLE STORAGE SOLUTIONS

FLEX Building Systems is creating storage units which are uniquely suited for indoor storage facilities. In an industry that is growing as fast as this one, it's important to be able to scale your business quickly and provide storage solutions that your customers will love. FLEX can help you do that!

- LIGHT WEIGHT
- FAST TO ASSEMBLE
- REVOLUTIONARY DESIGN
- DURABLE
- LOW MAINTENANCE

FLEX is helping storage businesses transform unused commercial space into profitable businesses! To find out more about how we worked with a Midwest storage company to transform an old steel mill into a thriving self-storage business, visit our social media pages and check out our blog at Flexbuildingsystems.com/blog.

FLEX

Outdoor Storage

Benefits of FLEX over Traditional Materials

- Lightweight composite construction allows for portability with a standard fork lift.
- Composite material requires virtually no maintenance, is UV stabilized and resistant to moisture and insects.
- Maximized storage potential - Flex portable units can be placed where traditional storage cannot. With custom platforms, lightweight designs, and weather resistant packages, previous limitations are removed.

- When purchased as equipment, Flex storage units can have many tax advantages.
- Great investment - Flex storage units are cost effective and easily scalable to accommodate your storage growth.
- Flex Building Systems offers a 10 year limited warranty.
